1. Problem Statement

Bhutan, a rapidly developing nation with a growing tourism industry and a vibrant local food culture, currently lacks a dedicated, centralized platform where both tourists and local residents can discover restaurants, read authentic peer reviews, and explore full menus before making dining decisions.

Tourists visiting Bhutan often struggle to find reliable information about local restaurants, their menus, pricing, and quality. Locals similarly have no efficient way to share dining experiences or discover new restaurants based on honest community feedback. Restaurant owners, meanwhile, lack a digital channel to showcase their offerings to a wider audience.

Key Problems Identified:

- No centralized restaurant discovery platform exists for Bhutan.
- Tourists and locals cannot view restaurant menus with images and prices online before visiting.
- There is no reliable, community-driven review system for Bhutanese restaurants.
- Restaurant owners have limited digital visibility.
- Users cannot save or bookmark favourite restaurants for future reference.

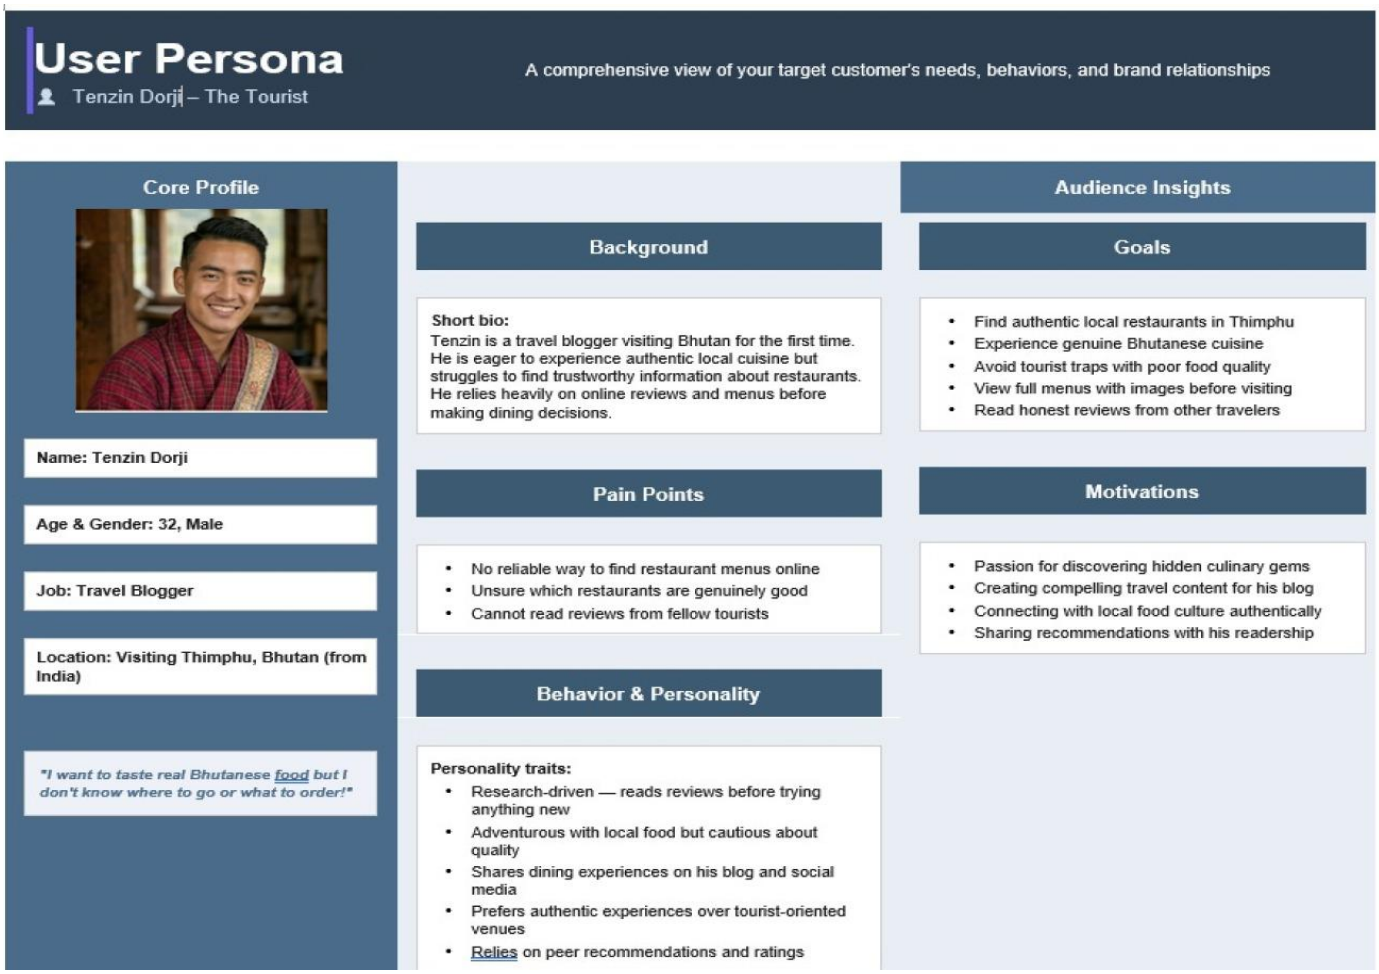

Proposed Solution:

Review & Dine is a web-based restaurant discovery and review platform tailored for Bhutan. It allows users to browse restaurants ranked by community ratings, view full menus with images and prices, submit reviews after dining, and save favourite restaurants. Restaurant listings are automatically ordered by highest review score on the homepage, ensuring the best dining experiences are always highlighted first.

2. User Personas

The following five user personas were developed based on user survey insights and represent the key segments of the Review & Dine user base.

Persona 1: The Tourist

Persona 2: The Local Foodie

User Persona

Karma Wangchuk – The Local Foodie

A comprehensive view of your target customer's needs, behaviors, and brand relationships

Core Profile

Name: Karma Wangchuk

Age & Gender: 26, Male

Job: Software Developer

Location: Thimphu, Bhutan

"I love trying new restaurants but there's no easy way to know if a new place is worth visiting."

Background

Short bio:
Karma is a tech-savvy local foodie who loves exploring Thimphu's growing restaurant scene. He regularly dines out with friends and enjoys sharing his opinions, but is frustrated by the lack of a central platform for Bhutanese restaurant discovery and reviews.

Pain Points

- No platform to share reviews or discover new places beyond word of mouth
- Hard to find menus without calling the restaurant directly
- Cannot easily filter restaurants by cuisine type or location

Behavior & Personality

Personality traits:

- Early adopter of digital apps and services
- Enjoys writing and sharing opinions online
- Dines out 3–4 times per week with friends
- Follows food trends and new restaurant openings
- Prefers community-driven recommendations over ads

Audience Insights

Goals

- Discover new restaurants in Thimphu regularly
- Share dining experiences with the local community
- Find restaurants with specific cuisine types easily
- Access menus with prices before visiting
- Build a personal list of favourite restaurants

Motivations

- Love of food and exploring new dining experiences
- Building his reputation as a local food expert
- Helping the community make better dining decisions
- Being the first to discover and review new places

Persona 3: The Restaurant Owner

User Persona

Pema Lhamo – The Restaurant Owner

A comprehensive view of your target customer's needs, behaviors, and brand relationships

Core Profile

Name: Pema Lhamo

Age & Gender: 45, Female

Job: Restaurant Owner / Manager

Location: Paro, Bhutan

"My food is excellent but tourists don't even know my restaurant exists!"

Background

Short bio:
Pema owns a traditional Bhutanese restaurant in Paro. She is proud of her menu and food quality but struggles with digital visibility. She currently relies on social media and word of mouth, which limits her reach, especially with tourists who could significantly boost her business.

Pain Points

- Limited digital presence and online discoverability
- No platform to list the full menu with photos and prices
- Relies only on social media which has limited reach
- Tourists cannot find her restaurant easily

Behavior & Personality

Personality traits:

- Passionate about traditional Bhutanese cuisine
- Hands-on manager involved in daily operations
- Open to technology but needs simple, accessible tools
- Values customer feedback and quality control
- Entrepreneurial mindset focused on growing the business

Audience Insights

Goals

- Get more visibility for her restaurant online
- Attract both local and tourist customers
- Showcase menu items professionally with images
- Receive and respond to customer reviews
- Compete digitally with larger, more visible restaurants

Motivations

- Growing her restaurant into a well-known brand
- Pride in serving high-quality traditional food
- Supporting her family through a successful business
- Reaching the growing tourist market in Paro

Persona 4: The Budget Student

User Persona

Sonam Choden – The Budget Student

A comprehensive view of your target customer's needs, behaviors, and brand relationships

Core Profile

Name: Sonam Choden

Age & Gender: 19, Female

Job: College Student

Location: Gyalpozhing, Bhutan

"I want good food but I'm always on a tight budget, so I need to check prices before going."

Background

Short bio:
Sonam is a college student living on a tight budget. She enjoys eating out occasionally but always needs to know prices in advance to avoid overspending. She is mobile-first and uses her phone for everything, but currently has no easy way to compare restaurant prices in her area.

Pain Points

- Cannot check prices online before visiting a restaurant
- Easy to overspend without knowing menu costs in advance
- No way to filter restaurants by price range
- Limited budget means mistakes are costly

Behavior & Personality

Personality traits:

- Budget-conscious with every dining decision
- Mobile-first user who discovers everything on her phone
- Shares affordable food finds with college friends
- Looks for value-for-money rather than premium experiences
- Often dines in groups and coordinates meal plans

Audience Insights

Goals

- Find affordable restaurants with good food quality
- Check prices before visiting to avoid overspending
- Avoid wasting money on disappointing meals
- Discover student-friendly dining options nearby
- Compare restaurant prices quickly and easily

Motivations

- Making the most of a limited student budget
- Enjoying social dining experiences with friends
- Finding reliable value-for-money restaurants
- Sharing budget-friendly tips with her peer group

Persona 5: The Food Critic / Blogger

User Persona

Rinchen Namgay – The Food Blogger

A comprehensive view of your target customer's needs, behaviors, and brand relationships

Core Profile

Name: Rinchen Namgay

Age & Gender: 38, Male

Job: Freelance Food Blogger

Location: Thimphu, Bhutan

"Bhutan needs a food review culture and I want to be at the center of building it."

Background

Short bio:
Rinchen is a seasoned food blogger passionate about documenting Bhutan's culinary landscape. He wants to build a following and influence dining culture but lacks a dedicated local platform with the reach and structure needed to publish and compare restaurants effectively.

Pain Points

- No dedicated local platform to publish reviews and reach a relevant audience
- Hard to compare restaurants systematically
- Existing social media lacks structured review formats
- Difficult to build credibility without a verified review platform

Behavior & Personality

Personality traits:

- Detail-oriented — writes thorough, structured reviews
- Visits multiple restaurants weekly for research
- Photographs dishes professionally before eating
- Engages actively with the Bhutanese food community
- Analytical approach to scoring and comparing restaurants

Audience Insights

Goals

- Document and publish honest, thorough restaurant reviews
- Build a following around Bhutanese food culture
- Influence dining trends in Bhutan
- Be recognised as a trusted authority on local restaurants
- Create a searchable archive of Bhutanese restaurant reviews

Motivations

- Deep passion for Bhutanese food and culinary heritage
- Building a professional reputation as a food critic
- Creating a thriving food review culture in Bhutan
- Turning his passion into a sustainable freelance career

3. Sitemap

The sitemap below outlines the structure of the Review & Dine website, showing all six pages and their hierarchical relationships.

Page	Content / Purpose
Home	Hero banner, restaurant list (sorted by rating), search & filter, featured cuisines
Restaurant Detail	Full menu with images & prices, restaurant info, location, opening hours
Reviews	View all reviews for a restaurant, star ratings, submit a review form
Favourites	Saved/bookmarked restaurants by the logged-in user
About Us	Mission, team, why Review & Dine was built for Bhutan
Contact Us	Contact form, phone, email, office address

Sitemap Structure (Text Representation):

Review & Dine (Root)

- Home — Entry point, restaurant listings sorted by rating
- Restaurant Detail — Accessed by clicking any restaurant card
- Menu — Full menu with images and prices (sub-section of detail)
- Reviews — User reviews and rating submission (sub-section of detail)
- Favourites — Saved restaurants (requires login)
- About Us — Platform information and team
- Contact Us — Contact form and details

Navigation bar is accessible from all pages: Home | Favourites | About Us | Contact Us. Users must log in to submit reviews or save favourites.

4. User Journey Map

The user journey map below follows Persona 1 — Tenzin Dorji, a tourist visiting Bhutan, through his complete experience of discovering and reviewing a restaurant using Review & Dine.

Journey Stages, Actions, Thoughts & Emotions:

Awareness	Discovery	Exploration	Decision	Post-Visit
Hears about Review & Dine from a friend	Visits homepage, sees restaurants sorted by rating	Clicks on a restaurant, views menu & photos	Reads reviews, decides to visit	Eats at restaurant, submits a review
Is this website trustworthy?	Which restaurant has the best reviews?	Does the menu have options I like?	Are the reviews genuine?	I want to share my experience
Curious	Interested	Excited	Confident	Satisfied

Journey Narrative:

Tenzin arrives in Thimphu and is recommended Review & Dine by his hotel concierge. He visits the homepage and is immediately greeted with a list of restaurants sorted by highest ratings. Curious, he filters by 'Thimphu' and browses the top-rated options. He clicks on 'Momo Palace' and views the full menu with images — the ema datshi and momos look appetising and are within his budget. He reads the reviews, gains confidence, and decides to visit. After a satisfying meal, he logs into Review & Dine and submits a 5-star review, contributing to the platform's community of reviewers.

5. User Flow

The user flow below illustrates the step-by-step path a user takes from arriving on the Review & Dine homepage to successfully submitting a restaurant review.

#	Step	Description
1	**User lands on Homepage**	Homepage loads with restaurants sorted by highest rating first
2	**Browse / Search**	User browses the list or uses the search/filter bar to find restaurants
3	**Click on Restaurant**	User clicks a restaurant card to open its detail page
4	**View Menu & Reviews**	User views full menu with images/prices and reads existing reviews
5	**Decision Point**	User decides to visit OR goes back to browse other restaurants
6	**Visit Restaurant**	User visits the restaurant in person
7	**Submit Review**	User logs in and submits a star rating + written review
8	**Review Published**	Review is published and updates the restaurant's overall rating

Decision Points in the Flow:

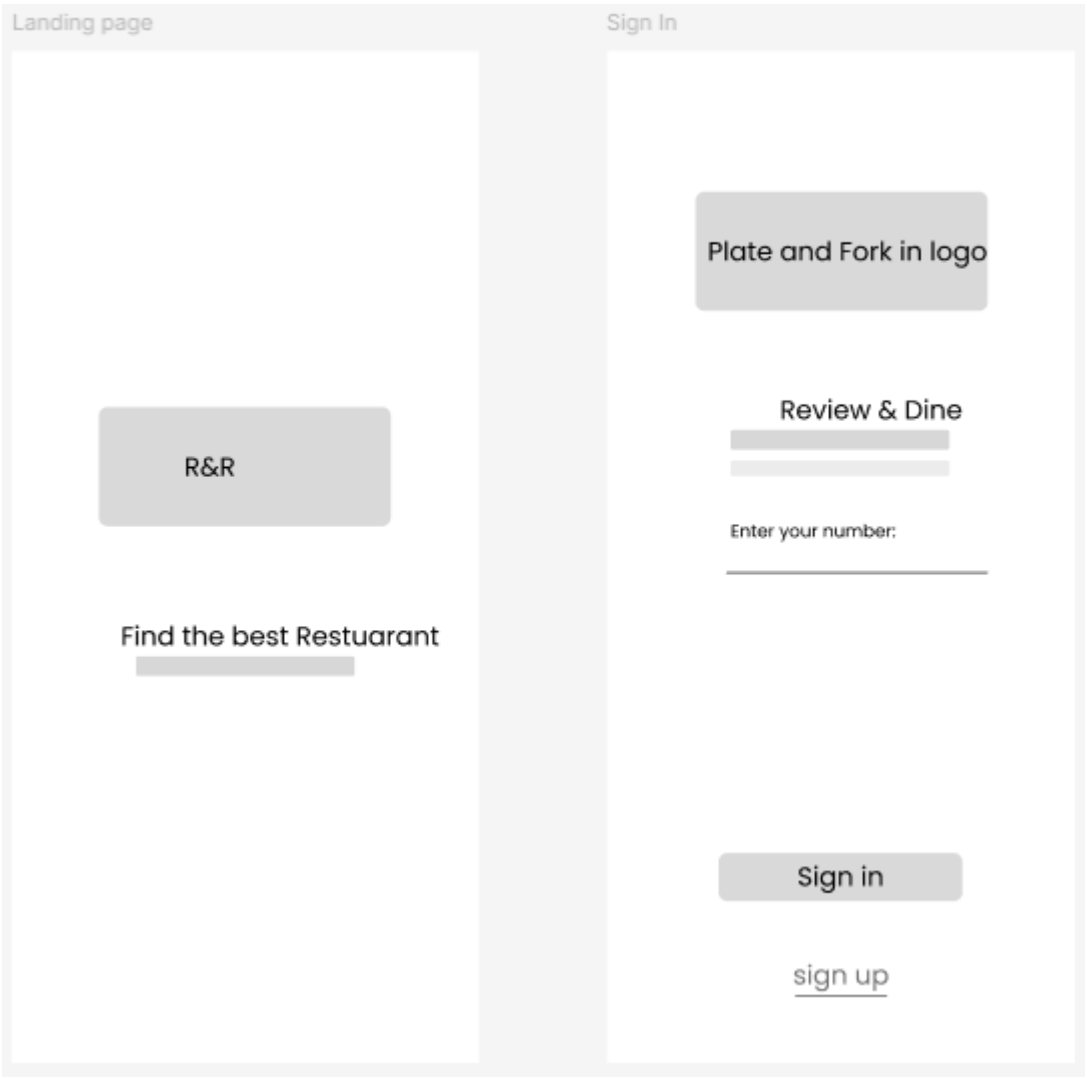

- At Step 5 (Decision): If the user is satisfied with what they see, they proceed to visit. If not, they return to Step 2 to browse other restaurants.
- At Step 7 (Submit Review): If the user is not logged in, they are prompted to log in or register before submitting. Once authenticated, they can submit the review.
- At Step 8: The submitted review immediately updates the restaurant's average rating, which may affect its position on the homepage ranking.

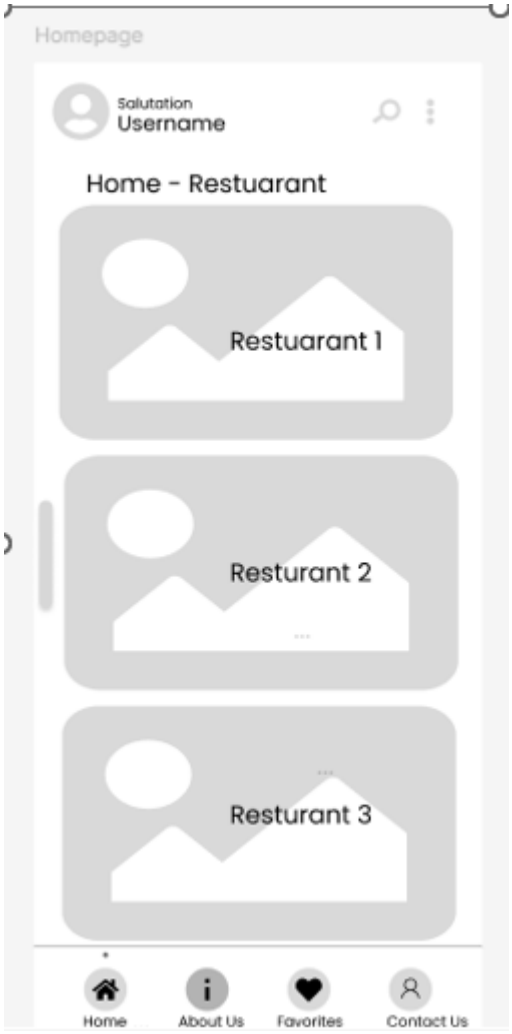

6. Wireframes with Full Annotations

Low-fidelity wireframes were created for all key screens of the Review & Dine website using Figma. The wireframes cover both desktop and mobile platforms. Each wireframe is accompanied by detailed annotations explaining the purpose and functionality of each UI element.

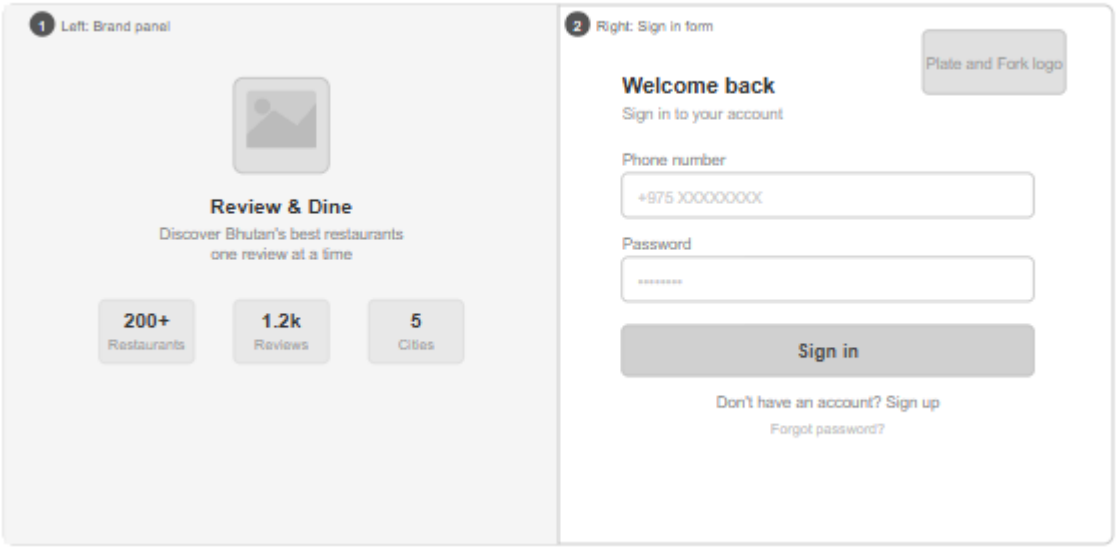

6.1 Homepage Wireframe

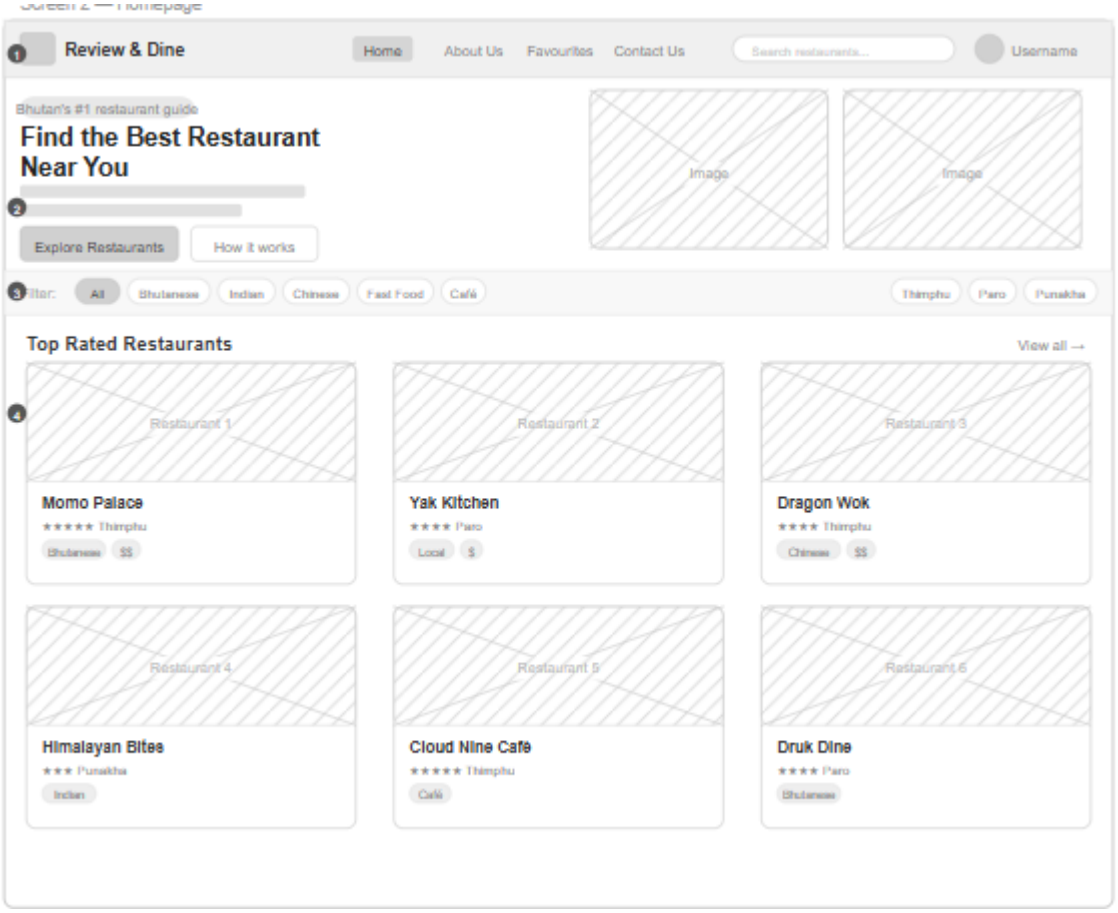

Wireframe: Homepage		
#	**UI Element**	**Annotation / Purpose**
1	**Navigation Bar**	Fixed top navigation with logo on the left and links (Home, Favourites, About, Contact) on the right. Collapses to hamburger menu on mobile.
2	**Hero Banner**	Full-width banner with the tagline 'Discover Bhutan's Best, One Review at a Time' and a prominent search bar.
3	**Search & Filter Bar**	Allows users to search by restaurant name, filter by cuisine type, city, or price range.
4	**Restaurant Cards Grid**	Grid of restaurant cards sorted by highest average rating first. Each card shows restaurant name, cuisine, location, star rating, and a thumbnail image.
5	**Star Rating Display**	Visual star rating (1-5) prominently shown on each card to help users quickly identify top-rated restaurants.
6	**Featured Cuisines Section**	Horizontally scrollable section of cuisine categories (Bhutanese, Indian, Chinese, etc.) that act as quick filters.
7	**Footer**	Contains links to About Us, Contact, Privacy Policy, and social media icons.

6.2 Restaurant Detail Page Wireframe

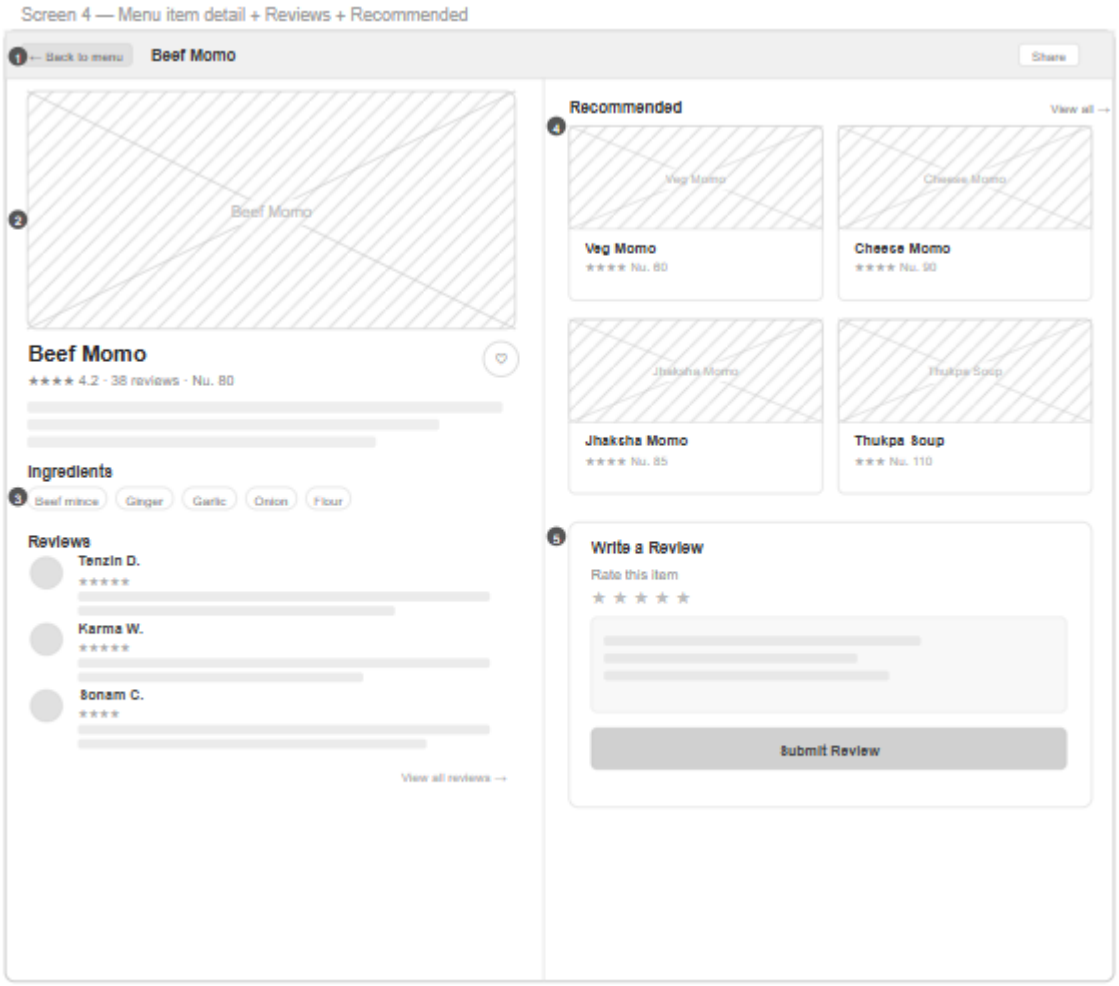

Wireframe: Restaurant Detail Page		
#	**UI Element**	**Annotation / Purpose**
1	**Restaurant Hero Image**	Large banner image of the restaurant at the top of the page for visual appeal.
2	**Restaurant Info Block**	Displays restaurant name, overall star rating, cuisine type, location, opening hours, and phone number.
3	**Menu Tabs**	Tab navigation between 'Full Menu', 'Reviews', and 'Info' sections for easy access without page reload.
4	**Menu Item Cards**	Grid of menu items, each showing an image, item name, description, and price in Bhutanese Ngultrum (Nu.).
5	**Add to Favourites Button**	Heart icon button that allows logged-in users to save the restaurant to their Favourites page.

6	**Reviews Section**	Displays all user-submitted reviews with star rating, reviewer name, date, and written comment.
7	**Submit Review Form**	A form with star rating selector, text area for written review, and a submit button (requires login).

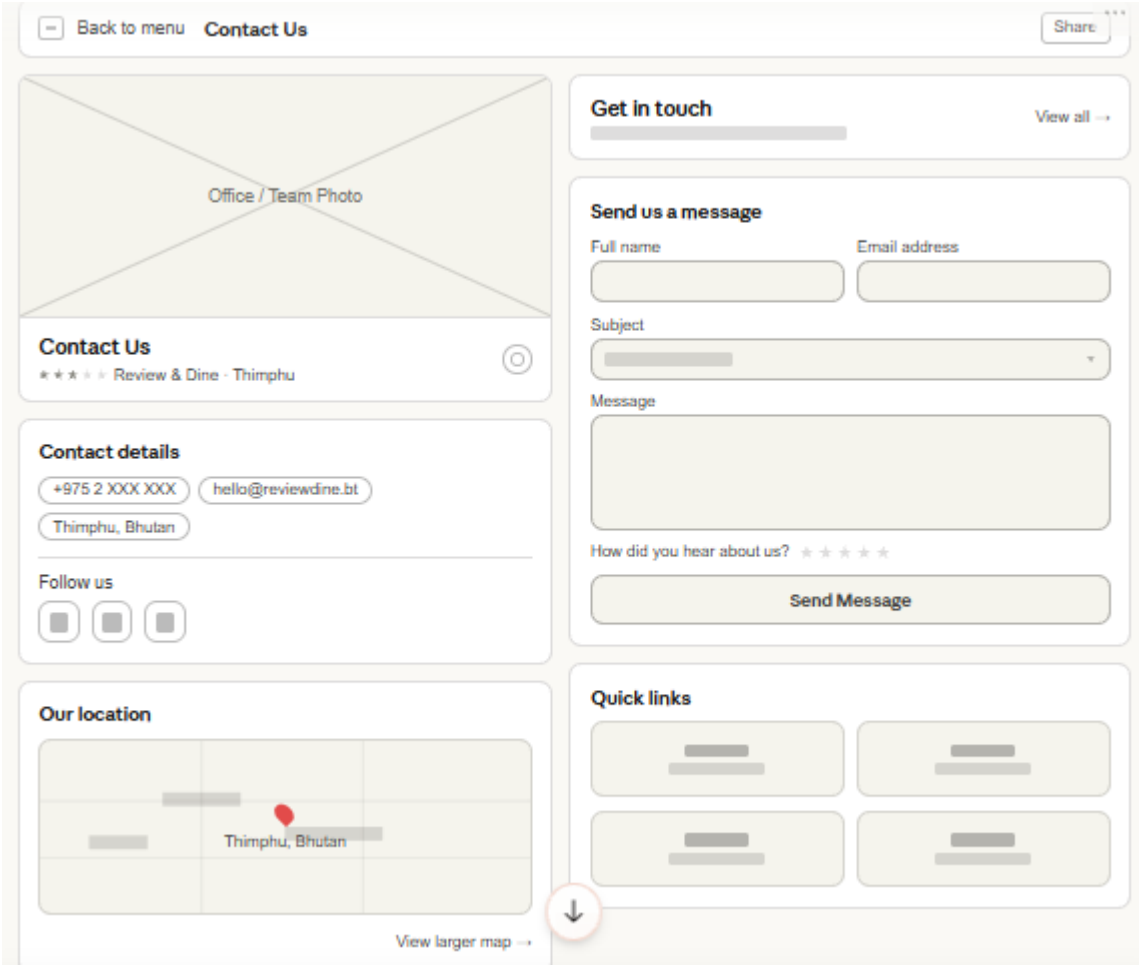

Screen 3 — Restaurant detail + Menu

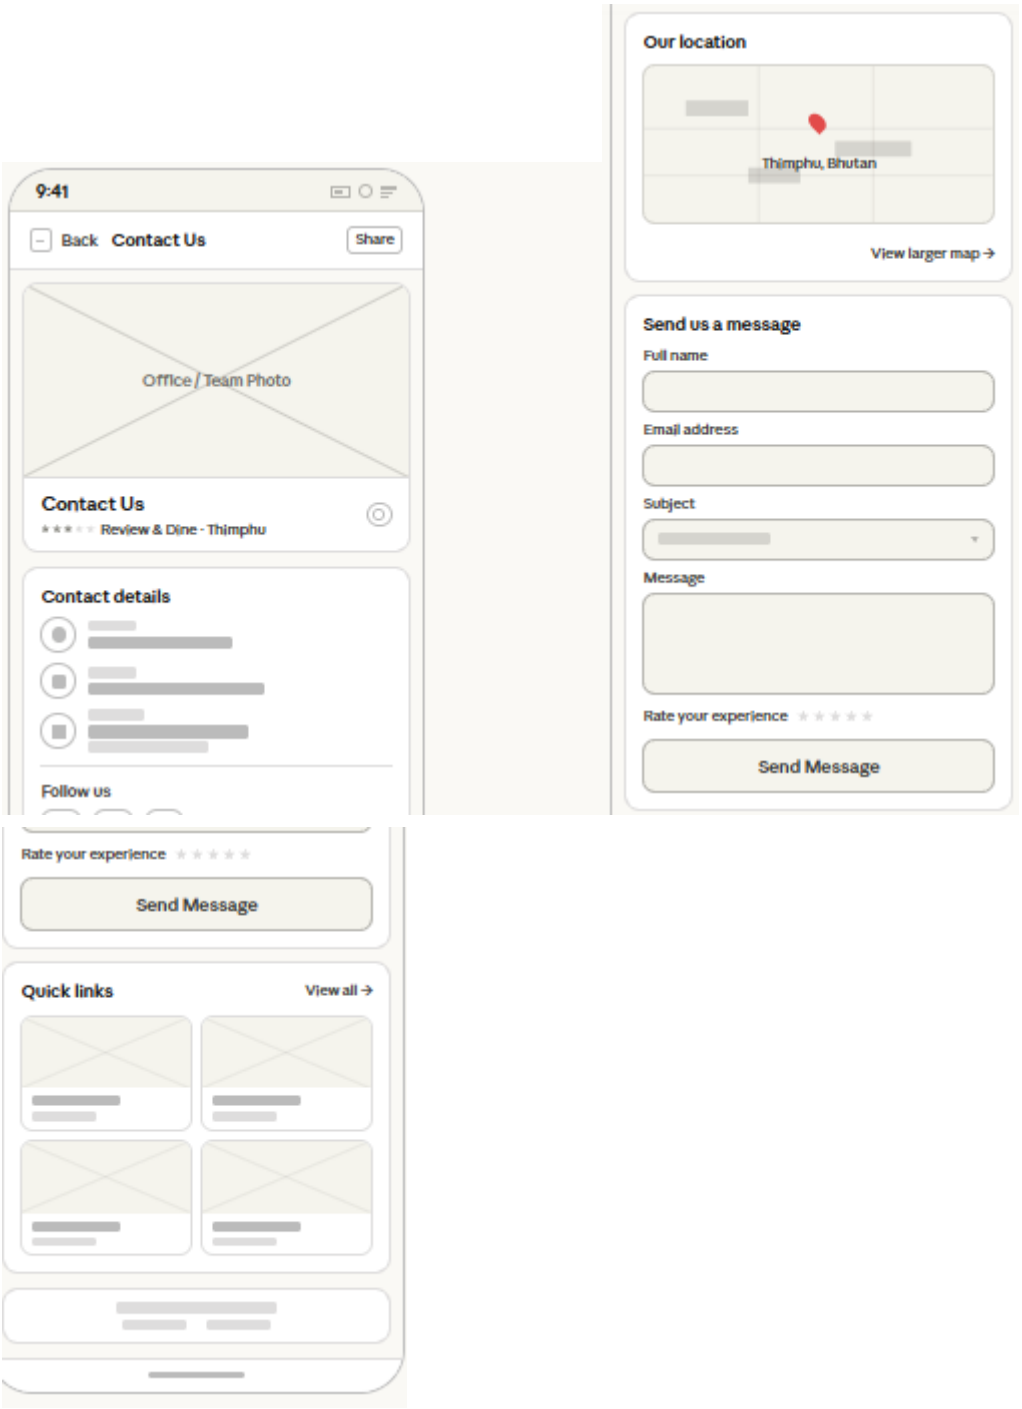

6.3 Contact Us Page Wireframe

Wireframe: Contact Us Page		
#	**UI Element**	**Annotation / Purpose**
1	**Page Header**	Clear 'Contact Us' heading with a brief invitation message encouraging users to reach out.
2	**Contact Details Block**	Displays phone number, email address, and office address for the Review & Dine team.
3	**Contact Form**	Form with fields: Full Name, Email Address, Subject (dropdown), and Message. Includes a Send Message button.
4	**Map Embed**	Embedded Google Map showing the approximate office location in Thimphu, Bhutan.
5	**Social Media Links**	Icons linking to the platform's social media profiles for alternative contact channels.

6.4 About Us Page Wireframe

[INSERT FIGMA WIREFRAME SCREENSHOT — About Us Desktop & Mobile]

Wireframe: About Us Page		
#	**UI Element**	**Annotation / Purpose**
1	**Mission Statement**	A prominent statement of Review & Dine's mission to connect Bhutan's diners with the best restaurants.

2	**Our Story Section**	A narrative section explaining how and why Review & Dine was created, with a focus on Bhutan.
3	**Team Section**	Photo cards of team members with name and role, building trust and credibility with users.
4	**Platform Statistics**	Highlight key numbers: number of restaurants listed, total reviews, and cities covered.
5	**Call to Action**	A button prompting visitors to start exploring restaurants, linking back to the Homepage.
